٣/۵	Some people prefer to provide help and support directly to those in need. However, others prefer to give money to national and international charity organizations. Giving money to those in need can be a personally good experience, but there is a choice between donating nationally and internationally through charities or giving directly to those around you. One of the advantages of providing direct support is that you can know exactly how your money is spent. Another benefit is that you can see the impacts on those you are helping, which can lead not only to great personal happiness but also to respect from others who appreciate the work you do. There are advantages in giving to charities that are national and international. First and the best is helping in problems of global importance, such as curing diseases and human rights or helping	14
	those who are in bad environmental events like earthquakes and floods. In conclusion a person should make their own choice in helping others. The important point is that we continue to give to those who are more in need than ourselves. 45. What can it lead to when you see the impacts on those you are helping? 46. What is the important point in helping others? 47. What is the closest synonym for the word "benefit"?	
	a. experience b. advantage c. choice d. effect	
	48. Helping people in bad environmental events has the global importance. a. True b. False	
	49. All people feel great personal happiness when they help others. a. True b. False

	A dictionary is a collection of words ranging from letters A-Z. When reading or writing a story, an essay, a paragraph or even a sentence, using a dictionary is a great help. There are many advantages of using a dictionary. So, using a dictionary is important for students. The first advantage of using a dictionary is pronunciation. We can also listen to the pronunciation of the words if we use an audio dictionary. The second advantage of using a dictionary is checking out a word's right spelling. The third advantage of using it is learning a word's part of speech. It is one of the types into which words are divided in grammar according to their use, such as noun, verb, or adjective. Lastly, example sentences are mostly available. Seeing specific words used in a sentence can provide more context and help you better understand proper usage. However, searching words by using a dictionary takes a lot of time. By using a talking dictionary, we are able to look the words up in a few minutes. As a result, a dictionary is a great help for everyone, especially students who are learning a language and who are interested in language learning. people borrow words from other languages when they need them.

Reading 14 متن زیر را بخوانید و به سوالات به صورت خواسته شده پاسخ دهید. Suppose that you have a very small vocabulary. Also suppose that you don't know how to get the meanings of new words. When you come across an unfamiliar word, that word may stop your understanding of the passage. Your eyes pause too long on the word as you try to get its meaning. You go back and read the word again, try to get its meaning from the context. As a result, you read much more slowly than you should, and you find that the difficult word is a wall to your comprehension. Suppose that you know many words and that you are skilled in finding the meanings of new words. Your eyes move quickly and you read rapidly. You comprehend what you are reading. If you have a good vocabulary, you are more interested in reading. 45. What may happen when you come across an unfamiliar word? 46. How does having a good vocabulary influence your reading habit? 47. What is the closest synonym for the word "suppose"? a. believe c. understand b. accept d. imagine 48. Unknown words in a passage may make comprehension easier. a. True b. False 49. The meaning of a new word may be guessed from the text. a. True b. False 4 متن زیر را بخوانید و گزینه صحیح را انتخاب کنید. 15 What do people need to light their homes and drive cars? Energy! Energy gives power to many things we need and use. Most of the energy people use comes from coal, oil, and gas. They are called fossil fuels. Those fuels come from fossils under the ground. Fossils are the remains of plants and animals that lived long ago. Burning fossil fuels pollutes the air. The air becomes dirty. That can be harmful to people, animals, and plants. Now more people are using clean energy. Such energy does not pollute the air. Two kinds of clean energy are wind power and solar power. **Solar power:** The sun gives Earth heat and light. Some homes have solar panels on the roof. The panels collect sun light and turn it into electricity. That is a kind of energy. It lets people do many things. For example, we use electricity to light our homes and watch television. Solar power can also be used to warm up the water in our homes. Wind power: People can turn wind energy into electricity. Wind turbines are machines that spin when the wind blows. They make electricity. 50. Where does most of the energy that people use come from?

متن زیر را بخوانید و به سوالات به صورت خواسته شده پاسخ دهید. The size and shape of your ears show your character more than any other part of the face. Other parts of the face change shapes as we get older, but ears do not change their shapes. They only change in size. Reading people's character from their ears is a very old science. In the past people thought that a person's ears with color were dangerous. They also thought that the shape of the ears showed if a person was musical or not. Today, too many people believe that the size and shape of the ears help you know if a person is musical. Ears are all different, and each different thing has a meaning. Next time you look at a person, see if his or her ears are large, medium-size, or small. Look at the lobes(نرمه گوش). Ears that are always red mean that a person may get angry easily. Ears that are always cold and nearly white color mean that a person has a nervous character. 52. When we grow up, . . a. our ears will not change in size b. our ears will be the same size. c. our ears will get colder d. our ears will not change in shape. 53. If someone's ears are red, it means b. he/she is very happy a. he/she is a kind person c. he/she may get angry easily d. he/she drinks a lot 54. If you look at someone's ears, the right way is to see b. the size, color and shape a. his face, ears and nose c. his mouth, eyes and nose d. the hair, eyes and color 55. How can we find out a person has a nervous character through his/her ears? a. When they are cold b. When they are medium-size c. When they are not white color d. When they are musical ۴ 18 متن زیر را بخوانید و گزینه صحیح را انتخاب کنید. A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word 'dictionary' comes from the Latin 'dictio' ('saying'). There are several types of dictionaries. Dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meanings of technical words. There are also dictionaries which translate words into other languages. Very often one volume translates both ways; for example, half of the book is from English to Persian and the other half from Persian to English. «ادامه سؤالات در صفحه ی ششم »

There are many languages in the world some of which may seem harder to learn for second or foreign learners. But which is the most difficult language to learn? Well, it's not easy to reply because there are many factors to discuss. A native speaker of French, for example, will find English easier to learn than a native speaker of Chinese, for instance, because English is very similar to French, while Chinese is very different, so first Language can affect learning a second language. The greater the differences between the second language and the first, the harder it will be to learn. Many people answer that Chinese is the hardest language to learn, possibly influenced by the thought of learning the Chinese writing system, and the pronunciation of Chinese appears to be very difficult for many foreign learners. However, for Japanese speakers, who already use Chinese letters in their own language, learning writing will be less difficult than for speakers of languages using the Roman alphabet. Teachers and the conditions in which the language is learned also play an important role, as well as each learner's motivation for learning. If people learn a language because they need to use it for a living, they often learn it faster than people studying a language that has no direct use in their day to day life.

- **35.** The word "it" in line 6 refers to
 - a) learning first language
 - b) second language
 - c) difference of languages
- d) Chinese language

The research for new sources of energy has led into various ways. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil and coal. Electricity is generated from coal, oil and natural gas, but the process has proven to be expensive.

Experimental works are started to produce energy by other resources. Scientists and experts spared no pains to search for new ways of producing energy. For instance, electricity has been produced with giant wind turbines. Geothermal power or the heat from the earth is also being tested to produce energy. Many societies are burning rubbish and other biological waste products to produce electricity. Not only changing unwanted products to gas or oil is a cheap way to produce energy, but also it is an effective way to get rid of waste.

Some experts expect service companies to expand hydroelectric power generated from streams and rivers. As an example, 50 years ago hydroelectric power provided one third of the electricity used in the United States but today it includes only 4%. The oceans are another possible source of energy. Scientists are studying ways to change the energy of oceans' tides and waves into electricity. Experiments are also underway to make use of temperature differences in ocean water to produce energy.

Clean energy resources are vastly respected, appreciated and used all over the world to keep the environment clean. As a result, scientists try to introduce new types of energy resources called clean energy resources to nations of the world.

- **41.** Which is the best title for this passage?
 - a) The use of waste products for energy
 - b) The search for new sources of energy
 - c) Effective ways of producing hydropower
 - d) New discoveries in geothermal power

Cell phones are one of the world's greatest inventions. They keep us in touch with friends and family and can be life savers in an emergency. Although they can be found everywhere, they are still new to society and people should learn suitable behavior when they use them. Here are some suggestions for using the cell phones politely.

Your phone doesn't have to be on all the time and you don't always have to answer it immediately. Avoid taking calls or texting when you are engaged in a face -to-face conversation. During the time that you are attending an important business meeting, or in a party with friends and family, try to hide your mobile. Placing your phone on the table or desk sends the clear message that they are not so important for you. Texting or talking on the phone during a formal business meeting is highly unacceptable and rude. It is polite and responsible to turn off your cell phone or put it on silence before meetings, meals, and meaningful moments. If you can't turn your device off, turn it to silent or vibrate. If you have an important job, for example you are a doctor or nurse, or waiting for an emergency call, first apologize the others, then leave the room or walk at least 10 steps away and talk quietly. It shows that you know how to use your cell phone properly.

- **47.** These days, most people know how to use their phone in a polite way. a) True b) False
- **48.** It is better to turn off your cell phone before meetings.

- a) True
- e b) False
- **49.** Why shouldn't you put your mobile on the desk during a meeting?
- **50.** What should you do with your cell phones when you are talking with someone face -to -face?
- **51.** What should you do when you have an emergency call in a meeting?

متن زیر رابخوانید و به سوالات داده شده هر قسمت پاسخ دهید.

When early humans hunted and collected food, they could not control their environment. They could live in their environment like other animals. When humans learned to make fire, however, they became skillful at changing their environment. To provide themselves with fuel, they cut trees and made fires. Parts of forests were changed to lands to increase the growth of grass and to provide a greater area for the animals that humans ate as their food. This improvement ended in farming and also keeping animals as sources of human food. Fire also provided the means for cooking plants which were not used before. After meeting the simple need for food, early humans began to follow other goals such as founding the cities and living in larger groups.

True / False

- **33.** Early humans killed the animals and ate them as their food. a) True b) False
- **34.** Early humans discovered how to make fire. a)True b)False

b) humans

Respect is a way of acting well or thinking highly about something or someone. You respect those who are important to you. You show your respect by being polite and kind. When you are impolite or act badly toward people, they may feel sad or angry. But whom should you respect the most?

You must care for those who always care for you. You know that your parents care for you for every little thing. You must love them, respect them, and care for them. Besides bringing you into the world, your parents spend their time, energy, and strength to make sure that you have what you need or want. Telling them that you thank them reflects the level of your respect for them.

There are many things that a dictionary can provide for the users, but a good dictionary must always give example sentences for every word. An example sentence is an English sentence which contains the new word. Example sentences are actually more important than definitions. A definition tells you the meaning of a word and (sometimes) gives you some grammatical information. Example sentences have more to say. They have at least two good points: First, they let you check if you have understood the definition correctly. The meaning of a word can become much clear if you read a few sentences with the new word. Second, they show you how to use a word in different sentences (for example, the word "important" is often used in the phrase "It is important to") or words in combination (for example, you may know that "tell" and "say" are synonyms, but the word "truth" goes with "tell" and not with "say"). Example sentences present this information in a clear way. You can easily copy them to make your own sentences seem more natural.

True / False

- **45.** You can see the new word in its example sentence.
- a) True
- b) False

- **46.** Definitions sometimes give you grammatical information.
- a) True
- b) False

Answer the questions.

- **47**. What does the word "truth" usually go with?
- **48**. How can you make your own sentences more natural?

Writing 14 جملات زیر را با کلمات ربط (but, and, so, or) کامل کنید.

- **49**. I get up early in the morning,..... I make an omelet myself.
- **50**. We can eat our lunch at the restaurant,..... we can have it at home.
- **51**. They wanted to call you,..... they did not have your phone number.
- **52**. That dictionary is expensive,..... I can't buy it.

F Reading

For English teachers, a dictionary is essential for any teaching program and needs to be used carefully. A dictionary is the basic thing for any language class .The most important thing that a student should know is how to use it. A student needs to have at least three dictionaries available to learn English properly. The first one should be a bilingual dictionary that covers words in the native language as well as in English. The second one should be a monolingual dictionary that gives word information in English. The third one should be a native language dictionary.

When teaching begins, learners will use a bilingual dictionary for simple translations. Monolingual dictionaries are also necessary pieces of language learning studies, because they provide learners with definitions, pronunciations, etc. The problem becomes hard with studies when the students do not fully understand the words **they** are translating, and they get confused. Teachers know that they should clear up the confusion quickly before they jump into to the next lesson. When the students enter a more advanced level, they must have a native language dictionary that relates to their own language. When they do not understand the meaning of a translated word in their own native language, they can use this dictionary to figure it out.

Recently people are becoming more interested in new types of cars because of some good reasons. For example, electric cars do not burn gasoline in the engine, so they do not pollute the air. They use electricity stored on the car in batteries. An electric car is usually plugged in at night. It can be plugged into a special charging unit even at houses. Some electric cars can be plugged right into a <u>regular</u> electrical wall outlet. Others need a larger outlet, like the kind that a stove or a vacuum cleaner plugs into. The engineers are trying to make better batteries that hold more energy and last longer. To overcome the problem of charging electric cars, hybrid cars are also available. <u>They</u> combine the benefits of gasoline engines and electric motors. They can be designed to meet different goals, such as better fuel economy or more power.

True / False

35. Electrical cars have batteries.

- a) True
- b) False

36. Hybrid cars only use electricity.

- a) Tru
- b) False

A dictionary is a book that explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word 'dictionary' comes from the Latin 'dictio' ('saying').

There are several kinds of dictionaries. Dictionaries that explain words and how they are used; dictionaries that translate words from one language to another; dictionaries of biography that tell about famous people; and technical dictionaries that explain the meanings of technical words.

Dictionaries that explain what words meaning give a clear 'definition' of them. A good dictionary also gives more information about words. For instance, it explains how they are pronounced. Usually the International Phonetic Alphabet (IPA) is used for this purpose. A complete dictionary also tells you about the origin of words and the story behind them. For example, the words like 'pajamas', 'bazaar' and 'paradise' entered English from Persian.

The most common type of clean energy is the solar power. Solar energy is produced by the radiation that reaches the earth. People have used the sun as a heat source for thousands of years. Iranians, for instance, use special designs and arrangements of windows, balconies and vards to get the most sunshine. Different kinds of materials might also be used in building the houses. This keeps people warm during cold seasons and cool during hot days of the year.

Nowadays, solar energy can be converted into other forms of energy, such as heat and electricity. Solar energy might be used for heating water and air in homes, buildings, or swimming pools. Maybe you've seen buildings or houses with big shiny panels on the roof. These solar collectors collect heat by absorbing sunlight and producing solar power. Solar energy is used in generating electricity for watches, highway signs, houses and even space stations.

True/False

ردیف Reading متن زیر رابخوانید و به سوالات داده شده هر قسمت پاسخ دهید. Energy is the ability to do work. It can take a variety of forms: mechanical, electrical, chemical, and nuclear. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil, and coal. We get most of our energy from these fossil fuels, but this is harmful to the environment. Fossil fuels are nonrenewable and cannot be replaced easily. Once we use them up, they're gone forever. They are not clean as they pollute water or air. In recent years, scientists try to use other types of energy resources. They call them clean energy resources because they do not pollute the earth. Clean energy is renewable. It is made from resources that can be replaced, like wind, water, sunshine, tides, and plants. The most common type of clean energy is the solar power. Solar energy is produced by the radiation that reaches the earth. People have used the sun as a heat source for thousands of years. Iranians, for instance, use special designs and arrangements of windows, balconies and yards to get the most sunshine. Different types of materials might also be used in building the houses. This keeps people warm during cold seasons and cool during hot days of the year. True/False 26. According to the passage, mechanical, electrical, chemical, and nuclear forms are varieties of a)True b) False **27**. The resources of the earth are used to produce energy. a)True b) False Choose the best answer. **28.** Fossil fuels are nonrenewable means that theyeasily. b) can be replaced a) can not be consumed c) aren't replaced d) are polluted **29.** The most common type of clean energy is produced by thethat reaches the earth.. b) wind d) radiation c) plant Answer the following question. **30.** What do Iranians use to get the most sunshine? متن زیر رابخوانید و به سوالات داده شده هر قسمت یاسخ دهید. 11 It is very important for us to respect our teachers. We should note that teachers were not always teachers. They were once students like us. They have experienced school time like us. We know that teachers want to help students learn. They have a lot to share with us: their life experiences, their failures, their successes and many more. When we respect others, we are actually respecting ourselves. We can show our respect to our teachers by paying attention during lessons and following classroom rules. Remember that a good student is always prepared for class.

F	Many Scientists believe some kinds of technology are harmful to your health. For example, they say that mobile phones should be used as little as possible. They think it is better to be careful about using mobile phones. A lot of scientists believe they are harmful and bad specially for children. In fact, researches show that mobile phones could kill more people than smoking. They can cause headaches, tiredness, and memory loss in some people. We have so much technology now; there are 24-hour televisions, computers, online games, phones and so on. Technology can be dangerous if you spend a lot of your time for using it. You should not keep electrical devices in your bedroom when you are sleeping because they can cause sleep problems. It is important to have no electric items in your bed. If you cannot do without them, make sure you do not have a computer or mobile in your bedroom or at least make sure that they are turned off. You should use your mobile phone for limited amount of time each day because they can cause brain problems if they are used for a long time over the years. Always remember that your health is very important as you might find you are unable to return good health once you have lost it. True/False 36. According to the passage, Mobile phones are not very harmful for children. a) True b) False Answer the following questions. 37. Mobile phones can cure memory loss in some people a)True b) False Answer the following questions. 38. What are some examples of technology? 39. Why shouldn't you keep electrical devices in your bedroom? 40. What happens if mobile phones are used for a long time over the years?	17

Reading متن زیر رابخوانید و به سوالات داده شده هر قسمت یاسخ دهید. Many countries have used the energy in moving water for thousands of years. And today, it's still a powerful resource that can generate clean, renewable, and cheap electricity. They produce energy from running water and convert it to electricity. The power that is produced as a result of falling or running water is called "hydroelectric power" or "hydropower". Turbines and generators convert this power into electricity. Today, about 19% of all our electricity is generated from hydropower, making it one of the largest sources of renewable power. So what makes hydropower renewable? It's simple: water. Water is converted into clouds and recycles back to earth as rain. This process is called "The Water Cycle". The water cycle is continuously recharging and can be used to produce electricity along the way. True/False 26. According to the passage, the energy in moving water can generate clean, renewable, and cheap a)True b) False electricity. 27. The street was very dark and quiet. He hadn't experienced such a thing before. While he was walking, a car pulled over. He looked at the driver. He was sure he had seen this man before. He wondered who he could be. The driver waved at him and came out of the car. He asked Mike if he could drive him home. Suddenly Mike remembered he was one of his clients. His name was John. John had come to his office two or three times before. The last time he was in the office, he was so upset. He was worried because he had lost his documents. Everyone in the office tried to help him. They started to look for his suitcase. Finally, he remembered that he had left his suitcase in his car! He apologized for his anger and left. He hadn't seen him since then. A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word 'dictionary' comes from the Latin 'dictio' ('saying').

There are several types of dictionaries. Dictionaries which explain words and how they are used; dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meanings of technical

words. Dictionaries which explain what words mean give a clear 'definition' of <u>them</u>. A good dictionary also gives more information about words. For instance, it explains how they are pronounced. Usually the International Phonetic Alphabet (IPA) is used for this purpose.

There are also dictionaries which translate words into other languages. When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning.

True/False

- **35.** You can find words easily because dictionaries put them in alphabetical order.
 - a)True b) False

36. The word 'dictionary' comes from the French 'dictio'.

a)True b) False

- Answer the following questions.
- **37.** What does "**them**" in the first line of paragraph 3 refer to?
- **38.** What do technical dictionaries explain?

Complete the sentence.

پارگراف زیر مربوط به سوالات ۴۳ الی ۴۵ می باشد در پاسخنامه (43. Topic Sentence)،

(جمله بی ربط) (44.Not Supporting Sentence) و (45. Concluding Sentence) را مشخص کرده ودر جدول مربوطه بنویسید.

Ants are interesting insects. Like all insects, they have six legs. Each leg has three joints. Yesterday, my sister saw an ant. The legs of ants are very strong, which help ants run very quickly. If a man could run as fast for his size as an ant can, he could run as fast as a racehorse. Ants can lift 20 times their own body weight. So, they are amazing and odd insects.

Solar energy is the most effective of all energy resources and it can even be available in cloudy weather. The solar energy which comes to the Earth is about 10,000 times greater than the amount which humankind consumes. Solar technologies can deliver heat, cooling, natural lighting, electricity, and fuels. Solar technologies convert sunlight into electrical energy through solar panels or mirrors. Although not all countries use solar energy, it is possible for every country to apply it.

The cost of producing solar panels has surprisingly decreased in the last few years, making them not only in access but often the cheapest form of electricity. Depending on the type of material used in their production, solar panels can work for around 30 years.

True/False

- **29)** Solar energy comes from the earth.
- **30)** Solar panels cost a lot in the last few years.
- 31) Solar panels convert sunlight into electrical energy.
- **32)** All countries use solar energy to generate electricity.
- a. True **b.** False
- a. True b. False
- b. False **a.** True
- **a.** True **b.** False

Complete the following sentences.

- **33)** In cloudy weather is available.
- **34)** Solar are produced to work for a long time.

Answer the question.

35) What do solar technologies deliver to us?

Sleep is essential for all people. Did you know that sleep is more important than food? A person, who does not sleep, dies at a younger age than one who does not eat. Let's say you sleep 12 hours later than you usually do. It will take your body about three weeks to return to normal. We spend about one-third (1/3) of our lives in sleep. That's about 121 days a year!

How much sleep do we require? We are all different. A baby needs 16 hours of sleep every day. Children 6 to 12 years old need an average of 10 to 12 hours of sleep. A teenager needs 9 to 10 hours, and an adult needs an average of 7 to 8 hours of sleep a night. Of course, some people need only 3 hours of sleep each night. Others need 10 hours of sleep. After age 50, the average sleep time goes down to 6.5 hours a night. We need less sleep as we get older.

True/False

36) Food is less important than sleep.

- a. True
- **b.** False

- **37)** There is no difference in sleep time among people.
- a. True
- **b.** False

۴	Children are taught to respect elders by their parents at very young ages. Throughout school and university, they are reminded of them while their personalities develop. But still, we often forget to respect our elders. Respecting elders should come from within. Respecting elders come under good habits and manners. Everyone welcomes a well-behaved person. As we all know, history repeats itself. If we will respect our elders today, we will get respect when we grow old. There are many ways to show respect to elders. For example, they feel happy and honored when we include them in the decision making of the family. They are more experienced than us and they also have walked the same path before us. So, we should always ask for their advice. Another way is listening to them and following their customs, which they have lived up to. We should also repeatedly visit them and invite them to our house, too. We should often sit and eat with them. All this will help us to recognize and appreciate our elders. Always remember that people are always judged by their actions and each word or action has a reaction. So, if you want to succeed and be happy in life, start respecting elders by being polite. Finally, I would like to say, our elders are really worthy and we should respect them. Choose the best answer

140	Although you might not like ants when they get in your food or get into your home, ants are interesting tiny insects and do help the environment. They are advanced social insects, because they live in highly organized large colonies where each group has complicated important relationships with many others. The queen ant has wings and its primary function is to lay eggs. The other female ants are called workers. They build the anthill, find food and even act as soldiers. The soldier ants protect the queen, defend the colony and attack enemy colonies in search of food. Ants don't have ears. Ants hear by feeling vibrations in the ground through their feet. They can carry things 20 times heavier than their own body weight. The muscle arrangement in an ant gives it great strength allowing it to carry heavy things toward the entry point of the anthill. Their colonies can contain millions of ants. When a queen ant dies, the entire colony usually dies within a few months. Although many people may suppose that ants aren't dangerous, scientists have compiled a list of them which can hurt. For instance, there is a kind of ant in Australia that has a bite and can kill a person. * True / False 40) All ants are dangerous for human. a) True b) False Choose the best answer 41) Ants are social insects and do help the environment. a) True b) False Choose the best answer 42) Which of the following is NOT true about soldier ants? a) They take care of the queen. b) They help to defend the colony. c) They find food for the colony. d) They are very strong and big.	117
